

The vision of the project:

Realize Cedar is a project to redevelop the Cedar Street corridor into a more livable, walkable community through critical safety improvements and traffic measures that benefit the entire community.

About construction:

Construction will begin this spring and continue through the end of the year. While Realize Cedar construction will create a temporary inconvenience, it will pay dividends in the long-run by creating a welcoming community for everyone, including businesses, individuals, families and seniors.

How the project will change traffic:

As part of the project, Cedar Street will be reduced from four to three lanes, which will slow traffic downtown but reduce wait times at the Aurelius and Holt roads intersections.

Where to find more information:

Construction updates and information are regularly posted on the Realize Cedar Facebook page and on the project website at www.realizecedar.com.
